review: The Boat That Rocked

I've always loved British comedy and loved their humor even lot of people may disagree. usually most British film are about vampires and the undead but this time they take and different root, *The Boat That Rocked* was shown on *Showtime* the other day and the only reason i watched it is because it was British, but it was really really good funny film, that based on the 60's, where cloth and hair cuts was cool and the woman were just sexy.

I like the music the most and then the acting and directing was super. Overall very good funny sexy typical British film.

Plot> "*The Boat That Rocked*" is an ensemble comedy in which the romance takes place between the young people of the '60s and pop music. It's about a band of rogue DJs that captivated Britain, playing the music that defined a generation and standing up to a government that, incomprehensibly, preferred jazz. The Count, a big, brash, American god of the airwaves; Quentin, the boss of Radio Rock — a pirate radio station in the middle of the North Sea that's populated by an eclectic crew of rock and roll DJs; Gavin, the greatest DJ in Britain who has just returned from his drug tour of America to reclaim his rightful position; Dave, an ironic, intelligent and cruelly funny co-broadcaster; and a fearsome British government official out for blood against the drug takers and lawbreakers of a once-great nation. environment!

The other day i saw a report on Alwatan Tv about Kuwait Sea environment and that about 90% of Um Almaradem reefs are dead and as many on the other islands. It really sucks how Kuwaiti lack awareness and how badly they treat the environment.

The sea is one of the best relieve to kuwaitis and i think we should at least care about it ..

Posted picture is from the famous cartoonist [Mad M2000](#) which i followed and liked his drawings since his early days.

Keep the environment clean.

Guys in spare time!

I dont know how it's with girls but i know that a lot lots of guys when ever they free or have a spare time they just cant help it. They said on average, large number of guys do it 7~10 times a week, while a few number of girls do it 14-20 times a week. I thought its a guys habit but it turned out that girls do it even more 😊

review: The Hurt Locker

Good war film. Loved the acting and the directing, very fast flow film, good actions and thrills that makes you tense all the time. If the situations in IRAQ is close to what i've seen in the film then it's a fucked up situation for both IRAQI and American solders, fucked up big time.

What i liked in the film is how the Sergeant William James *baye3ha ma homa shay*, and what i didn't like is that all event happening in IRAQ and the ending is not that satisfying.

I really pity IRAQ and what happen there.. *allah la yer7omek ya Saddam 3ala ma saweet*.

Polt>An intense portrayal of elite soldiers who have one of the most dangerous jobs in the world: disarming bombs in the heat of combat. When a new sergeant, James, takes over a highly

trained bomb disposal team amidst violent conflict, he surprises his two subordinates, Sanborn and Eldridge, by recklessly plunging them into a deadly game of urban combat. James behaves as if he's indifferent to death. As the men struggle to control their wild new leader, the city explodes into chaos, and James' true character reveals itself in a way that will change each man forever. [Written by BWR Public Relations](#)

The film won 6 Academy Awards: Best Picture, Best Director, Best Original ScreenPlay, Best film Editing, Best Sound Mixing, Best Sound Editing. *The Film is that good* 😊

Hubble 3D at TSCK

The scientific center IMAX brining the latest IMAX masterpiece *Hubble 3D* for *Eid Holiday*. The film is narrated by *Yousif Mostafa* in Arabic and *Leonardo DiCaprio* in English

Plot> Hubble 3D, takes moviegoers on an unprecedented voyage through distant galaxies to explore the grandeur and mystery of our celestial surroundings. Experience never-before-seen 3D flights through the farthest reaches of the universe, and accompany spacewalking astronauts on some of the most difficult and important endeavors in NASA's history.

In May 2009, the crew of the Space Shuttle Atlantis launched a mission to make vital repairs and upgrades to the Hubble Space Telescope, the world's first space-based observatory, 350 miles above the Earth. On board was an IMAX 3D camera, operated by the shuttle astronauts. It captured stunning sequences of the five intricate spacewalks required to make those repairs, as well as close-up images of the effort to grasp the orbiting telescope with the shuttle's mechanical arm at 17,500 mph, and one unexpected problem that threatened to sabotage the entire mission.

Hubble 3D combines this breathtaking IMAX footage with images taken by the telescope during the nearly 20 years it has been our window into space. Through advanced computer visualization, Hubble's detailed data becomes a series of scientifically realistic flights that unfold on screen like a guided tour of the universe, through time and space.
